DOGM Lead:

**DIVISION OF
OIL, GAS & MINING**

STATE OF UTAH
DEPARTMENT OF NATURAL RESOURCES
DIVISION OF OIL, GAS AND MINING
355 West North Temple
3 Triad Center, Suite 350
Salt Lake City, Utah 84180-1203
(801) 538-5340

NOTICE OF INTENTION TO COMMENCE SMALL MINING OPERATIONS

The informational requirements of this form are based on provisions of the Mined Land Reclamation Act, Title 40-8, Utah Code Annotated 1953, as amended, and the General Rules as promulgated under the Utah Minerals Regulatory Program.

"Small Mining Operations" means mining operations which disturb five or less surface acres at any given time. 43 CFR Ch II # 3809.1-3

Utah Mining Claim Number(s) 72604-72610; 316402-316407;
316420-316424

Utah State Lease Number(s) _____

6. Have the above owners been notified in writing? Yes X No ____
If no, why not? Mr. Kim Leany, BLM Dixie Resource Area, St. George
sent letters on 12 June 1990 concerning operations and Wash Co.
permitting.
7. Does the operator have legal right to enter and conduct mining
operations on the land covered by this notice? Yes X No ____
Option from John E. Welsh, owner of unpatented Placer Mining Claims
- II. PROJECT LOCATION & MAP (Rule R613-003-105) Enclosed Aerial Photograph

1. Project Location:

County(ies): WASHINGTON

1/4, 1/4: <u>NC, SW</u> Section: <u>11</u>	Township: <u>41 S.</u>	Range: <u>18 W.</u>
1/4, 1/4: <u>SW, NE</u> Section: <u>14</u>	Township: <u>41 S.</u>	Range: <u>18 W.</u>
1/4, 1/4: _____ Section: _____	Township: _____	Range: _____

2. A topographic base map showing the location of the proposed small
mining operation must be submitted with this notice. A USGS 7.5
minute series map is preferred. The areas to be disturbed should be
plotted in sufficient detail so that they can be located on the
ground. It is recommended that the operator also plot and label any
previous disturbances in the immediate vicinity that he is not
responsible for. Enclosed 1:24,000 Topog. Map with claims plotted

III. OPERATION PLAN (Rule R613-003-106)

1. Type of mining: Surface X Underground
2. Mineral(s) to be mined: Gypsum
3. Provide a brief description of the proposed mining operation and onsite
processing facilities. OPEN PIT QUARRYING OF STEEPLY DIPPING PERMIAN
GYPSUM.
QUARRYING EQUIPMENT: DOZER, 966 LOADER, HYDRAULIC DRILL AND
COMPRESSOR
*SUBCONTRACTOR: Jaw Crusher and cone, screens
180 day rule applies when this operation commences

New Road(s): Length NONE (ft) Width _____ (ft)

Total project surface acreage to be disturbed <5 (acres)

*UACR - 3.1.9 "The owner or operator of a source previously approved under
this paragraph who intends to temporarily relocate the source (not to
exceed 180 consecutive days) shall submit a notice of intent to relocate
but is not required to submit additional plans and specifications nor is
the Executive Secretary required to submit the proposal for public
comment prior to approval or disapproval.

UT. Air Quality Contact: David Kopta, Engineer, (801) 538-6704
Probably use existing crusher and screening site between Ivins and Shivwits,
which is an operating source.

IV. OPERATION AND RECLAMATION PRACTICES (Rule R613-003-107 & 108) 43CFR ChII
#3809.2

The reclamation and operation obligation is to keep the area clean and safe, minimize hazards to public safety, return the land to a useful condition, and reestablish at least 70 percent of the premining vegetative ground cover. To accomplish this, the operator will need to perform reclamation concurrently, or at the completion (within one (1) year) of mining:

1. Keep the mining operation in a safe, clean, and environmentally stable condition.
2. Permanently seal all shafts and tunnels to prevent unauthorized or accidental entry.
3. Plug drill holes with a five foot cement surface plug. Holes that encounter fluids are to be plugged in the subsurface to prevent aquifer contamination.
4. Construct berms, fences, or barriers, when needed, above highwalls and excavations.
5. Remove, isolate, or neutralize all toxic materials in a manner compatible with federal and state regulations.
6. Remove all waste or debris from stream channels.
7. Dispose of any trash, scrap metal, wood, machinery, and buildings.
8. Conduct mining activities so as to minimize erosion and control sediment.
9. Reclaim all roads that are not part of a permanent transportation system.
10. Stockpile topsoil and suitable overburden prior to mining.
11. Stabilize highwalls by backfilling or rounding to 45 degrees or less, where feasible; reshape the land to near its original contour, and redistribute the topsoil and suitable overburden.
12. Properly prepare seedbed to a depth of six inches by ripping, discing, or harrowing.
13. Reseed disturbed areas with adaptable species. (The Division recommends seeding 20 lbs./acre of native and introduced species of grass, forb, and browse seed, and will provide a specific species list if requested.)

14. Plant the seed with a rangeland or farm drill, or if broadcast seeded, harrow or rake the seed 1/4-1/2 inch into the soil - fall is the preferred time to seed. (The Division also recommends broadcast fertilization at the time of seeding of 200 lbs./acre of diammonium phosphate 18-46-0.)

V. VARIANCE REQUEST (Rule R613-003-109)

Yes ☐ No ☒

Any planned deviations from Rules R613-003-107, Operation Practices, R613-003-108, Hole Plugging Requirements, or R613-003-109, Reclamation Practices, as summarized above, should be identified below and justification given for the variance request(s).
